

CIOMA MEMBER ALERT

No on SB 350 Alert your Customers!

August 20, 2015

CIOMA Members:

CIOMA has been fighting the good fight - helping many other organizations in the state in alerting the public of the potentially devastating impacts 2015 legislation - SB 350 - would have on our industry and the California economy. We are providing some materials, [click here](#), that you could use in communicating with your customer base. If they use petroleum, they need to know about SB 350.

Included are:

Fact Sheet - a quick summary of why SB 350 needs strong and loud opposition.

Proposition 39 Article Summary - a very recent Associated Press article has called into serious question the effectiveness of a recently passed state initiative - Proposition 39 - and its intent to create "green jobs" in this state. One of the main arguments that supporters of SB 350 use is that 50% reduction of petroleum by 2030 will create numerous "green jobs".

The AP article shows, even with the expenditure of millions of dollars so far, it has created insignificant job growth in this state.

We ask you to include this information to your customers, asking them to contact their state Assembly representative, asking them to defeat SB 350. It needs to be done QUICKLY since the Legislature is in session only until September 11.
